# Introduction

Le Laboratoire d'Analyse statistique des Langues anciennes de l'Université de Liège, fondé en 1961, a consacré l'essentiel de son activité à l'analyse morpho-syntaxique automatique de nombreux auteurs de la littérature latine.

Nous croyons que l'ampleur de la documentation que nous possédons nous permet de présenter un dictionnaire fréquentiel de la langue latine hautement représentatif de l'usage courant. Ce dictionnaire se fonde sur l'étude des auteurs suivants :

Catulle	Sénèque, Les Oeuvres philosophiques
César, De bello gallico	Sénèque, Les Tragédies
Cicéron, Catilinaires	Tacite, Agricola
Pro lege Manilia	Annales
De natura deorum, III	Dialogues des Orateurs
Pro Rabirio	Germanie
Tusculanes, V	Tibulle
Horace, Odes	Tite-Live, extraits
Juvénal	Virgile, Bucoliques
Ovide, Métamorphoses, extraits	Enéide, I à VI
Perse	Géorgiques
Propertius	Vitruve, 1. 9 et 10
Quinte-Curce	
Salluste, Catilina	
Jugurtha	

Cet ensemble monumental porte sur 794.662 occurrences qui se regroupent sous 13.077 lemmes différents.

La répartition entre prose et poésie est la suivante : sur les 794.662 occurrences étudiées, 582.411 figurent dans les oeuvres en prose et 212.251 dans les oeuvres poétiques.

Le dictionnaire fréquentiel présente le vocabulaire dans deux ordres, d'une part en ordre alphabétique, d'autre part dans l'ordre décroissant des fréquences.

Dans chacune des deux listes, le lemme est accompagné d'une série de trois nombres : le premier indique la fréquence du lemme dans l'ensemble des textes étudiés, le deuxième, sa fréquence dans les oeuvres en prose et le troisième, sa fréquence dans les oeuvres poétiques.

\*

\*

\*

Il nous faut exposer ici brièvement, les conventions que nous avons adoptées pour la présentation des lemmes. D'une manière générale, nous avons utilisé comme ouvrage de référence, le *Lexicon totius Latinitatis de Forcellini*\*. Ce dictionnaire nous a paru être l'instrument de travail le mieux adapté à nos recherches. Cependant, nous avons été amenés à nous en écarter sur certains points.

- 1.- Dans la graphie du lemme, il nous a semblé préférable d'opter pour l'orthographe ancienne, c'est-à-dire de remplacer les lettres J et U par les lettres I et V.
- 2.- Forcellini regroupe, dans un même article, toutes les formes d'un mot y compris celles qui se sont cristallisées dans des catégories grammaticales différentes. Ces dernières sont distinguées par des sous-lemmes qui les mettent en évidence.

\* *Lexicon totius Latinitatis* de FORCELLINI, Padoue, ed. de Corradini, 1864.

Ainsi, sous le lemme BONVS, Forcellini présente, après l'énumération des divers sens de l'adjectif, une première rubrique consacrée au substantif BONI-*bonorum* et une seconde consacrée au substantif BONVM-*boni*.

Quant à nous, dans des cas semblables, nous avons été amenés, pour des raisons de clarté, à créer des lemmes indépendants. Ainsi, pour BONVS, nous distinguons trois lemmes : l'adjectif BONVS, le substantif masculin pluriel BONI et le substantif neutre BONVM.

- 3.- Nous avons modifié la graphie archaïque de certains mots. Par exemple, nous avons adopté CAELVM et non COELVM, MAEREO et non MOEREO, PAVLVM et non PAVLLVM ...

Les lemmes homographes sont accompagnés d'une précision qui permet de les identifier immédiatement, soit par leur catégorie grammaticale, soit par leur traduction, soit encore par le mot dont ils dérivent. Ainsi, on trouvera AMICVS subst., AMICVS adj., TEMPVS, le temps, TEMPVS, la tempe, ACCIDO dér. de CADO et ACCIDO dér. de CAEDO.

Il faut noter que les noms propres sont compris dans le nombre d'occurrences, tandis qu'ils ont été éliminés de la liste des lemmes. Par ailleurs, un certain nombre de noms communs sont parfois employés comme noms propres. Dans ce dernier cas, nous les avons conservés et ils se présentent dans la liste, accompagnés du signe †. Le total des occurrences, si l'on exclut les noms propres, est de 759.881, soit 559.122 en prose et 200.759 en poésie.

\*

\*

\*

Nous avons joint, au dictionnaire fréquentiel, un lexique inverse qui comprend tous les mots-formes différents qui apparaissent dans notre Corpus. Chaque forme est accompagnée de sa fréquence. Ce lexique contient 81.755 formes différentes. Cette liste se différencie de l'ouvrage de GRADENWITZ, *Laterculi vocum latinarum* \* en ce qu'elle présente toutes les formes conjuguées et déclinées de la langue. Il faut noter que les lettres V et U sont confondues sous la forme U.

\*

\*

\*

Enfin, nous avons cru utile de présenter un tableau général de distribution des occurrences selon les différentes catégories grammaticales, pour la totalité du Corpus, pour la prose et pour la poésie.

La rigueur des chiffres fournis par ce tableau autorise des recherches sûres de nature quantitative.

Nous rappelons que, selon les techniques et les méthodes du L.A.S.L.A., chaque mot de ce dictionnaire a fait l'objet d'une analyse morphologique et syntaxique complète, grâce à un traitement informatique très élaboré. L'ouvrage ne représente donc que la partie visible de l'iceberg. En fait, on peut dire qu'à propos de chaque mot, nous possédons, sur bande magnétique, une moyenne de 10 informations, ce qui représente plus ou moins huit millions de renseignements.

\* Otto GRADENWITZ, *Laterculi vocum latinarum*, Olms, Alpha-Oméga, Hildesheim, 1966.

Il était évidemment impossible de les imprimer. Mais il va de soi que toutes ces informations sont à la disposition du monde scientifique.

\*

\*

\*

Il est enfin important de dire ici que cet ouvrage est une oeuvre collective, réalisée non seulement par les membres de l'équipe du L.A.S.L.A., mais encore par plusieurs chercheurs qui sont venus travailler au Laboratoire. Perse et Vitruve ont été analysés par M. L. Callebat et son équipe de l'Université de Caen, Quinte-Curce, par M. J. Therasse de l'Université Laval, Juvénal par M. M. Dubrocard de l'Université de Nice, les Annales de Tacite, par M. Cl. Houbeau, collaborateur du L.A.S.L.A..

En outre, une équipe de jeunes professeurs de l'Enseignement secondaire belge, a apporté son concours à l'analyse de certains textes étudiés dans les Humanités.

\*

\*

\*

Nous exprimons notre vive reconnaissance à ces savants collaborateurs.
